

POSEIDON LIVE

Poseidon System's cloud-based data portal aggregates all data in easy-to-use web-based application. Provides controlled user access to their data as well as complete control by Poseidon. Integrates multiple sensor and data types, not just Poseidon oil sensors.

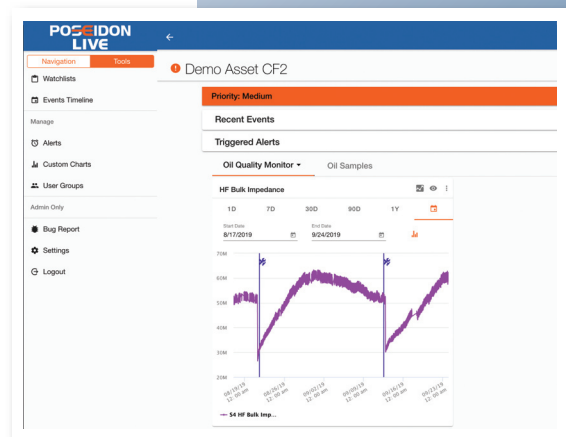

KEY FEATURES

- Modern, intuitive layout and look
- Easy to see critical items needing attention
- Easy to navigate hierarchical structure
- Customizable default data visualization per specific sensor type, asset, location, company
- Manage automatic alarms and notifications for peace of mind your assets are covered
- Built in events timeline to track important items and actions taken
